Operating Systems

Android uses Google

iOS uses Apple

Windows uses Microsoft

Medical Apps

- WebMD
- Blood Pressure Monitor
- MediSafe
- Refill Rx
- Active911

WebMD

Research conditions, check your symptoms with our symptom checker, access drug and treatment information, get first aid essentials, and check local health listings on the go. **Does not take the place of real medical professionals.**

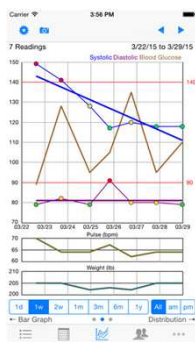

Blood Pressure Monitor

- iBP Blood Pressure

iBP is a blood pressure tracking and analysis tool. Please note, it is not possible to measure your blood pressure by touching the screen. A separate device is required.

(iBP is intended to be used as a means to collect data to be shared with your doctor. **This application is not intended to be a substitute for professional medical advice, diagnosis, or treatment.**)

MediSafe

Medisafe is the leading medication manager and pill reminder. If you need to organize and/or can't remember to take your meds, an app like this could be useful.

Refill Rx

RefillRx Mobile provides a one tap solution for refilling your prescriptions. Simply scan the barcode on your prescription bottle and watch as RefillRx Mobile sends your request to your local participating pharmacy.

If a barcode is not available you can also simply enter the Rx number for your prescription and search for your pharmacy by entering the phone number.

Active 911

Active911 is a digital messaging system that delivers alarms, maps, and other critical information instantly to first responders. Active911 also allows response efforts to be monitored in real time.

GPS Apps

- Google Maps
Get directions in real time.
- Mapmyride / Mapmyrun
Track your exercise and location.
- Wheres My Droid / Find My iPhone
Find where you left your phone.

Google Maps

See and hear turn-by-turn directions using Navigation (Beta).

1. Open the Google Maps app .
2. [Get directions](#) to a location.
3. To hear voice-guided Navigation, touch the Navigation icon .

Mapmyride / Mapmyrun

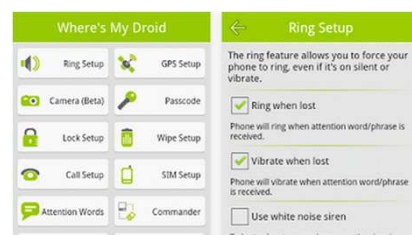

Fitness Tracking applications that enables people to use the built in GPS of smart phones to track activities. Records route, speed, time, elevation, and more.

DISTANCE 22.02 mi DURATION 1:46:08 AVG SPEED 12.5 mph KCAL 1689

Wheres My Droid / Find My iPhone

Tools to help find a phone in your house or far away.

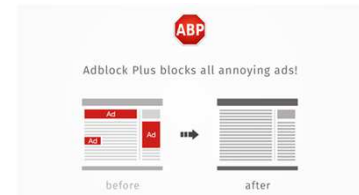

Internet

- Adblock Plus
Removes many pesky ads.
- Weather Channel
Find out about the weather.
- Pandora
Listen to your favorite music.

Adblock Plus

Most popular adblocker. Allows some unobtrusive ads to support websites, but removes the worst and can be configured to remove more.

Weather Channel

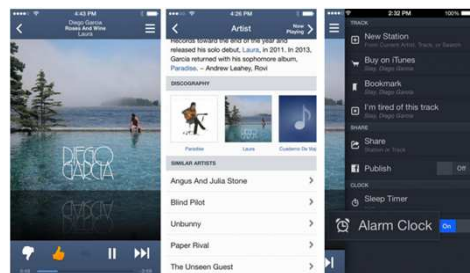

Forecasts and weather information as well as alerts.

Provides access to radar and other tools to keep you informed.

Pandora

Free Online Music (Paid service available)

Social

- Facebook
Social Media serving over 1 billion people.
- Facebook Messenger
On computers it is part of Facebook
- Skype
Talk to someone through video chat.
- Camera / Video Recording
Take pictures and video to share later.

Facebook

Facebook Messenger

The messenger service of Facebook runs independently from the Facebook App.

Chat with friends already on Facebook without giving away your phone number to them.

Skype

Free Video Calls

Instant Message with one person or a group.

Search old text conversations and contacts

Pay to call landline or mobile phone numbers.

Voice chat free with anyone on Skype.

Camera / Video Recording

Take pictures or record videos for yourself or to share. Can be attached to emails, texts, or sent to the cloud.

Assisting

Silver Surf

Web browser with larger buttons

Magnifier / Eye Reader

Use the phone like a magnifying glass.

Good Reads

Find good books based on books you like.

Flashlight

Use the LED light.
